How the P2V rating information is presented:

- **Green** for the highest rating which is always of the most significance when seeking to find the race winner
- **Amber** for those horses that I believe are less likely to win than the top rated but are of interest due to their price and relative value to the P2V top rating
- **Red** for those that I believe have a lesser chance down to those with a significantly lower rating who I believe cannot win the race
